956 MARINE AUTOMATIC

seconde/seconde/

INTRODUCTION

In a vintage-obsessed watch world, we decided to go REALLY vintage. Prepare for a twist on tradition: we've created the ultimate statement piece with the incredibly talented watch artist seconde/seconde/.

The artist behind seconde/seconde/ has carved out a unique place in watchmaking, bringing a sense of rebellion and humor that challenges tradition.

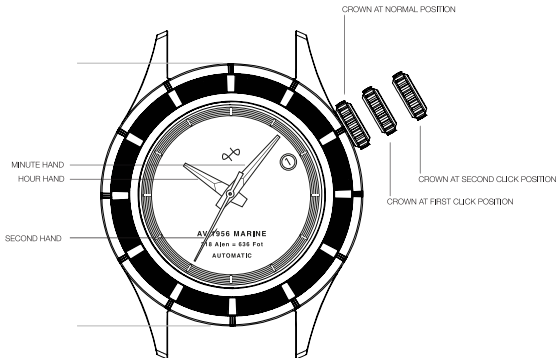

Starting his journey in a different field altogether, he eventually found his way back to watches, drawn by a desire to disrupt the status quo of horology. Early on, he began experimenting with vintage pieces, swapping out traditional watch hands for symbols that evoke pop culture and subtle wit, creating designs that blend nostalgia with the unexpected.

For him, each watch is a canvas—a chance to add “vandalism with a smile.” His creations are playful and self-aware, capturing the essence of art without losing respect for the craft.

From a modest beginning to collab with major names, seconde/seconde/ has stayed true to his vision: bringing a fresh, often mischievous perspective to a world steeped in convention, all while staying grounded in a deep appreciation for heritage and design..

SPECIFICATIONS

Caliber:	Miyota 8215 Automatic
Power reserve:	42 Hours
Glass:	Double domed sapphire glass
Water Resistance:	20.ATM – Water tested to 200 meters. Suitable for diving

Go to www.aboutvintage.com for warranty information

HOW TO SET TIME AND DATE

1. Unscrew the crown counterclockwise and pull out to first click position.
2. Turn the crown counter clockwise to set the date.
1. Pull the crown out to second click position.
2. Turn the crown counterclockwise to set the time.
3. Push the crown back into normal position.
4. Always securely screw in the crown.

You do so by pushing the crown towards the watch while screwing it clockwise until it's 100% tight.

If this is not done correctly you risk that moist and dust will enter your watch!

HOW TO WIND UP THE MAINSPRING

1. Rotate the crown clockwise at normal position.
2. Wind turning the ratchet wheel screw 8 times. It will start to move naturally after shaking slightly.
(with winding machine. Full wind up conditions
rotary speed : 30 rpm Operating time : 60 minutes.)

ACCURACY

1. Static Accuracy : -20~+40 seconds per day

FOR THE TRUE GENTLEMAN AND WOMAN

We are profoundly grateful.
Thank you for your support.

Take good care of your new timepiece.
Make moments, give it history
- let it become vintage.
